# Maricopa County Department of Public Health INFLUENZA UPDATE September 29, 2013 through October 12, 2013 Posted October 18, 2013

### Individuals with Laboratory Confirmed Influenza

The 2013-2014 influenza season starts on 9/29/2013 (week 40) and continues through 9/27/2014 (week 39). This influenza season (2013-14), there have been 2 individuals confirmed with an influenza test, no cases were reported this week. On October 4th, 2013, the first locally-acquired influenza case was confirmed at the Arizona State Public Health Laboratory. The state of Arizona reported **sporadic** activity for week 41 (10/6/2013-10/12/2013). The chart below shows tests each week for the current season (red) and previous seasons.

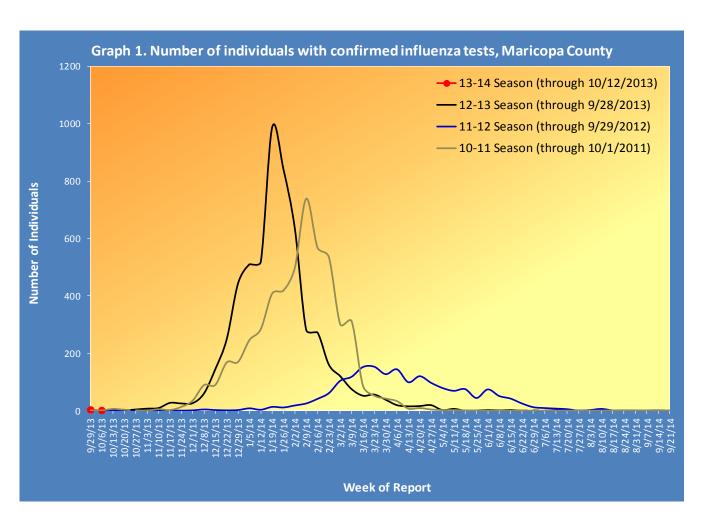

Table 1 shows the number of laboratory-confirmed cases reported this season compared to confirmed cases reported last week and last season.

Table 1. Laboratory-Confirmed Influenza Cases Compared to Last Week and Last Season,  Maricopa County					
Total	<b>Cumulative Season Total</b>	<b>Current Week Total</b>			
2013-2014	2	0			
2012-2013	1	0			
3 season average*	0.7	0.3			
% increase compared to 2012-2013 season	100%	N/A			
% increase compared to 3 season average	200%	-100%			
% increase compared to last week	0%	-100%			

<sup>\*</sup>Mean of past 3 influenza seasons

# Types of Influenza

This influenza season two types of influenza have been reported. Table 2 shows the number and percentage of tests reported by influenza type and subtype.

Table 2. Types/Subtypes of Influenza by Test, 2013-2014 Season, Maricopa County					
Total	2	100.0%			
Type A	1	50.0%			
Subtype 2009 H1N1	1	100.0%			
Subtype H3	0	0.0%			
Subtyping not performed or unknown	0	0.0%			
Туре В	1	50.0%			
Type Unknown	0	0.0%			

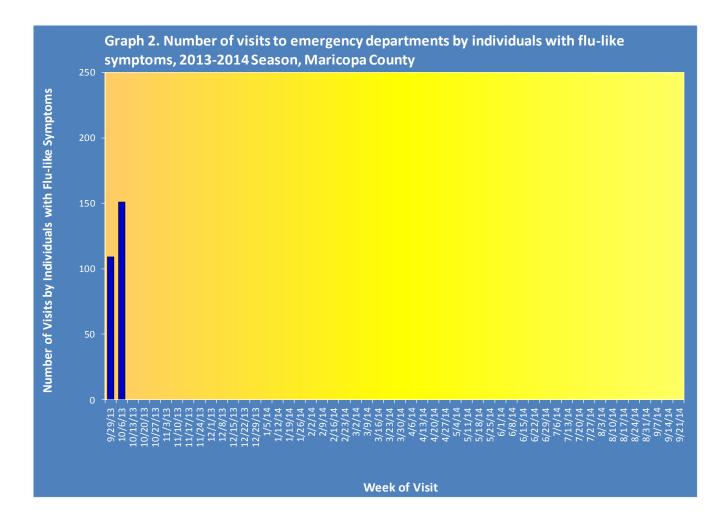

### Pneumonia and Influenza (P&I) Deaths

This influenza season there have been 42 pneumonia and influenza (P&I) deaths. This has decreased from last season's total of 55 P&I deaths. No influenza-associated mortality in a child has been reported this season or last season. Table 2 shows the number of P&I deaths and the number of influenza deaths that occurred this season and last season.

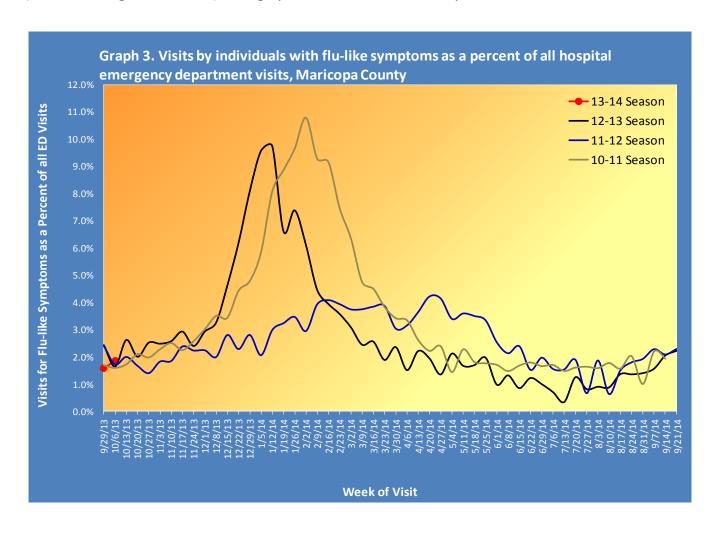

Table 3. Pneumonia and Influenza (P&I) Deaths, 2013-14 & 2012-13 Seasons, Maricopa County							
	Current Season (2013-2014) As of		Last Season (2012-2013) As of				
	[10/12/2013]		[10/13/2012]				
	Pneumonia and	Influenza	Pneumonia and	Influenza			
	Influenza		Influenza				
Pediatric (Under Age 18)	0	0	0	0			
Adult (18 and Over)	42	0	55	0			

## Respiratory Illness Activity at Hospital Emergency Departments

This influenza season there have been 260 visits to emergency departments by individuals with flu-like symptoms. To be counted as an individual with flu-like symptoms, the patient must have both fever <u>and</u> cough or sore throat. Graph 2 shows the number of patients with flu-like symptoms seen at 11 emergency departments.

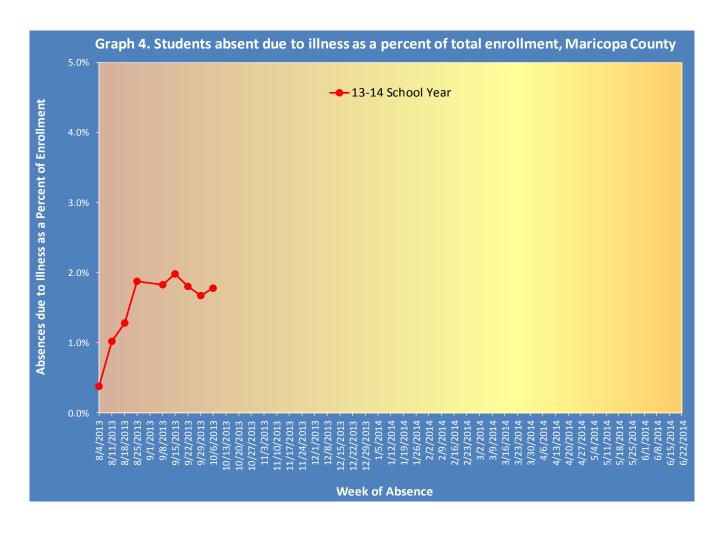

Graph 3 shows what percent of all emergency department visits were individuals with flu-like symptoms (fever and cough/sore throat). The graph shows the trend week by week, with the current season in red.

### Illness Activity at Schools

Graph 4 shows the percent of enrolled students in public schools who were absent due to illness (flu-like, gastrointestinal, other respiratory, etc.) as reported by their parents. The chart shows the trend week by week, for the current school year. This week, 7 out of 8 participating schools met the reporting criteria (≥ 3 days of reporting).

# The Maricopa County Department of Public Health wishes to thank all of the influenza surveillance participants:

Arizona Department of Health Services

Local Hospital Emergency Departments & Infection Control Practitioners

Maricopa County Public Schools

Maricopa County Office of Vital Statistics
